

28.10.2020

“Prof. apl.” for Evgenii Kondratenko

PD Dr. Evgenii Kondratenko was appointed "apl. Prof." by the dean of the MNF at the University of Rostock yesterday, 28.10.2020.

Congratulations!

Abb. 1: Prof. Evgenii Kondratenko, group leader „Reaktions Mechanisms“

As group leader of the research group "Reaction Mechanisms" he is dedicated to the detailed analysis of chemical processes.

The development of strategies to describe macroscopic observations in chemical reactors with microkinetic approaches and physicochemical catalyst properties is a central element of the research group. The deeper understanding of these relationships allows for a targeted catalyst development or improvement as well as the optimization of reaction control.
