Outstanding expert activity honored

Regine Rachow *Press Office*

Two chemistry professors from LIKAT, Jennifer Strunk and Evgenii Kondratenko, have been named Outstanding Reviewers by two prestigious journals: J. Strunk of "Energy & Environmental Science" and E. Kondratenko of "Catalysis Science & Technology".

In doing so, the journals honor outstanding "frequency, timeliness and quality" in the work of their reviewers, who evaluate articles submitted to the journals. The two journals are published by the U.K. Royal Society of Chemistry. Each of them honored ten experts in such a way this year.

With an impact factor of 30.289, the journal "Energy & Environmental Science" is the world's leading and most cited journal for important topics such as environmental science.
