

January 2021

LIKAT Welcomes New Head of Research Department "Electrochemistry & Catalysis" Dr. habil. Robert Francke

At the beginning of January 2021, the research department "Electrochemistry & Catalysis" with its head and Heisenberg fellow Dr. habil. Robert Francke started his work at LIKAT.

Dr. habil. Robert Francke, Head of Research Department „Elektrochemie & Katalyse“

Thematically, the area is mainly located in preparative electrochemistry and is focused on the catalysis of electrochemical reactions or the electrification of catalytic processes. Methods are developed for the conversion of organic compounds as well as for small molecules such as carbon dioxide. Mr. Francke and co-workers are looking forward to the upcoming projects and the future collaboration with colleagues at LIKAT.
