

April 2022

Robert Francke Starts New W3 professorship "Electrochemistry and Catalysis" at the University of Rostock

Along with six other scientists in Mecklenburg-Vorpommern, Robert Francke was appointed professor at the University of Rostock by the State Secretary for Science on March 31, 2022. Since the beginning of 2021, he has been head of the department "Electrochemistry & Catalysis" at the Leibniz Institute for Catalysis.

Prof. Robert Francke, Head of Department „Electrochemistry & Catalysis

Thematically, the topic is mainly located in preparative electrochemistry and is focused on catalysis of electrochemical reactions and the electrification of catalytic processes. respectively. Methods are developed both for the conversion of organic compounds as well as for small molecules such as carbon dioxide.
