

Nora Janssen Takes 2nd Place at Rostocks Eleven

Nora Janssen from the department Beveries represented LIKAT at the science communication workshop "Rostocks Eleven" and won a great 2nd place!

Congratulations!

The association "Rostock denkt 365°" organises this event every year. The Rostock location presents the efficiency of its science here.

Eleven science journalists from all over Germany get an intensive insight into the research of eleven young scientists and into highly innovative research projects of the eleven participating scientific institutions.

The participating journalists will award a prize to one of the presentations at the end of the event.
