

## Prof. Matthias Beller again Listed as „Highly Cited Researcher”

In the just published edition of Clarivate's most cited researchers 2022, Matthias Beller, scientific director of LIKAT, is listed again. ([Highly Cited Researchers - Clarivate](#))

The “Highly Cited Researchers” 2022 list is based on all publications from the last decade that were published and cited and ranked below the top percent in citations in their respective field. The basis for the data collection is the international database “Web of Science”. The number of citations of one's own research papers is considered an important evaluation criterion of scientists.
