

January 2025

LIKAT is leaving X (formerly Twitter)

... and thus joins the Leibniz Association and the DFG.

"As a research organization, the Leibniz Association stands for democratic values, in particular academic freedom, science-based, transparent information and international cooperation," emphasizes Leibniz President Martina Brockmeier: "X has developed into a platform that no longer appreciates all of this and encourages the spread of disinformation and misanthropy and anti-democracy to an alarming extent. Remaining on Platform X is therefore no longer compatible with our values."

Statement of the Leibniz Association:
